DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1-7 in the response of February 6, 2004 is acknowledged. The traversal is on the ground(s) that the examiner has not provided any reasoning or examples. This is not found persuasive because applicants own specification provided proof of the product being made by baking followed by application of oil (page 3, line 24).

The requirement is still deemed proper and is therefore made FINAL.

2. Claim 8 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim.

Specification

3. The abstract of the disclosure is objected to because it contains two separate paragraphs. Correction is required. See MPEP § 608.01(b).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1761

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-7 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/343,831. It would have been obvious to one of ordinary skill to use triglycerides for the remainder of the oil composition as shown by Yokomichi et al (column 8, lines 1-21).

This is a provisional obviousness-type double patenting rejection.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 1 recites "an oil-cooked or baked potatoes each of which". It is not clear whether both are being claimed, or just one.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1761

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokomichi et al [Pat. No. 5,514,405].

Yokomichi et al teach a fried food comprising fried potatoes (column 21, line 39), an oil composition including less than 2% monoglycerides and 20-40% diglycerides (column 8, lines 1-21), the diglycerides including at least 70% α -linolenic acid (column 5, line 65 to column 6, line 14), the use of antioxidants (column 1, lines 56-64), and the potatoes inherently absorbing 30-50% oil, as evidenced by Applicants' Admitted Prior Art (page 1, line 25).

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gotoh et al [Pat. No. 6,004,611], WO 99/59424, and EP 0525915 A1 teach oil compositions.
